Objective: Contribute my unique blend of creative and technical skills to an interesting opportunity in an entrepreneurial environment

---

Web Developer
GoHealth
Chicago, Illinois
September 2015 - Present

- Create and update sites used in paid search, display advertising, and affiliate marketing efforts.
- Coordinate with external clients to create branded gateways onto our platform
- Generate technical documentation and recommendations for future improvements on multiple legacy code bases

UI/Front-End Developer
Packback Books
Chicago, Illinois
November 2014 - September 2015

- Designed and implemented responsive views for projects built using AngularJS and Laravel
- Built and maintained the Bower package used for styling across all company projects
- Provided ad-hoc updates to Laravel API microservices
- Created build processes in both Grunt and Gulp
- Reviewed and provided guidance for teammates' code within my area of expertise

Front-End Developer
Freelance
July 2014 - Present

- Work with clients to implement new site features and resolve existing client-side issues
- Identify and fix cross-browser functionality problems
- Troubleshoot front-end build process issues

Web Designer/Developer
Links Technology Solutions
Schaumburg, Illinois
April 2012 - July 2014

- Provided JavaScript development for various projects
- Converted static visual design documents and wireframes to fully functional sites
- Handled occasional graphic design work which consisted primarily of asset manipulation/creation
- Made content updates to existing sites on numerous different platforms and technologies

QA Intern
Links Technology Solutions
Schaumburg, Illinois
February 2012 - April 2012

- Part-time, compensated position which was completed while still attending undergraduate classes
- Assisted in the regression and specification-based testing of "TariffShark: Hammerhead" - a desktop application for creating, managing, and submitting FERC tariff documents

---
